`pre-commit` Exercise

- Create a `.pre-commit-config.yaml` file in your Calculator repository
- Put the `repos:` key at the top of this file
- Go to https://pre-commit.com/
- Go to "Supported hooks"
- Filter hook id by "ruff"
- Click on github.com/charliermarsh/ruff-pre-commit
- Scroll down and copy the `pre-commit` hook of your choice into `.pre-commit-config.yaml`
- Run `pre-commit install` in the folder containing `.pre-commit-config.yaml`
